

Kjeld van Bommel, *TNO, Netherlands*

Kjeld van Bommel studied Chemical Technology and subsequently obtained his PhD in Supramolecular Chemistry at the University of Twente (the Netherlands) in 2000. After having worked on organogel chemistry for many years he moved to TNO in 2006 where he worked as a research scientist on various material related topics such as encapsulation and controlled release, as well as surface modification chemistry. In 2010 he moved to the Equipment for Additive Manufacturing department in which he currently works as a senior consultant with a focus on the innovative field of 3D Food Printing.
